Hybrid Learning Methodology for Andragogues

HYBRID LEARNING METHODOLOGY FOR
ANDRAGOGUES

No. 2022-1-LT01-KA220-ADU-000086565

What is the goal?

HyLearn will improve digital, communication skills of educators while they will additionally improve their technology application skills. In addition, the HyLearn may be attractive and applicable for other categories of EU citizens.

What are the results?

Compendium of hybrid learning

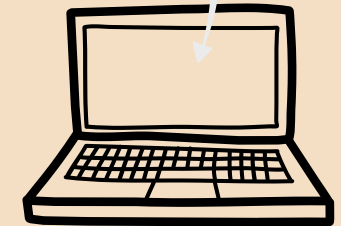

Identified Hybrid learning practices presented to our learners. In total 12 examples of using hybrid learning.

Hybrid learning methodology for educators

Open online program for educators suggested fully online. Main topics: (1) infrastructure, (2) security, (3) requirements for learning material, and (4) delivery issues specific for HL.

Virtual assistant

Framework for virtual assistance in Hybrid learning. Integrated into training program chatbots assure more effective teaching and support process.

The direct beneficiaries of the project are adult's educators and adults. Due to the project activities, beneficiaries will be better prepared for tasks, requiring digital competences digital competences and problem solving skills therefore enabling them to support a change in both in culture and society as well as in professional fields in industry.

Who is it for?
